Tanmay Patil

Software Engineer | ex-AWS | Java | Spring Boot | Golang |
Typescript | Open to relocation
Santa Clara, California, United States

Summary

Currently, at Mind Tech Inc., I work on designing secure cloud solutions to solve complex problems efficiently. Before this, I was at Amazon Web Services, where I helped optimize S3 storage on Snow Family devices—cutting down start-up times and enhancing real-time event notifications. Think of it as making sure your data moves faster and smarter in the cloud.

I love working with Python, Flask, and Rust to build rock-solid, scalable REST APIs. Whether it's crafting efficient data pipelines, improving distributed systems, or fine-tuning backend architectures, I'm always up for the challenge. I also have a knack for diving into containerized environments with Docker and Kubernetes and making cloud services play nicely together on AWS.

When I'm not working, I like to tinker with side projects—building fun and sometimes ridiculously over-engineered tools just for the joy of it. Whether it's automating something mundane, playing with new frameworks, or optimizing algorithms for no reason other than curiosity, I'm always experimenting.

If you love talking about backend optimization, cloud security, or just geeking out over cool tech, let's connect!

Experience

Mind Tech Inc

Software Developer

May 2024 - Present (1 year 6 months)

E*Testment LLC

Data Programmer Analyst

October 2023 - May 2024 (8 months)

San Jose, California, United States

- Developed a robust login page with Flask server-side session authentication, leveraging Redis for enhanced security.
- Designed and developed REST APIs for a file storage service using Rust with Axum for secure file management.
- Achieved efficient session management and secure file uploads, downloads, and deletions for users

Amazon Web Services (AWS)

Software Dev Engineer I

July 2021 - June 2023 (2 years)

In my role as a Software Dev Engineer I at Amazon Web Services, I drove the development of critical features for Amazon S3 compatible storage on Snow Family devices. I optimized setup processes to reduce service start-up times by over 50% and implemented S3 event notifications for real-time communication with customer brokers. Additionally, I developed automated canary tests for S3 APIs to ensure continuous monitoring and quality assurance.

Immucor, Inc.

Software QA Engineer Intern

June 2021 - July 2021 (2 months)

Mountain View, California, United States

- Developed unit tests for a Windows desktop application using SQL and C++ to ensure functionality.
- Conducted manual testing and identified UI bugs, enhancing the overall user experience.
- Collaborated with the team at Immucor, Inc. to improve the quality of the application

E*Testment LLC

Data Programmer Analyst Intern

October 2020 - January 2021 (4 months)

San Jose, California, United States

IBM

Data Scientist Intern

January 2019 - July 2019 (7 months)

Bangalore Urban, Karnataka, India

In my role as a Data Scientist Intern at IBM, I designed and implemented face detection and recognition models for an ID verification system, achieving

over 95% accuracy in classifying various ID types. Additionally, I developed a Tuberculosis classification demo with an accuracy of over 85% using chest X-ray data. I also deployed a flask application on Kubernetes service from IBM Cloud.

Jio

Software Engineer Intern

May 2018 - August 2018 (4 months)

Navi Mumbai, Maharashtra, India

I successfully refactored the Jio Coverage Platform code base at Jio, removing duplicate files and making them compatible with the Windows file system. This led to a 20 MB reduction in project size. Additionally, I implemented a CI/CD pipeline to automate build, backup, and code review/analysis, reducing manual workload by 30%.

RELIANCE CORPORATE IT PARK LIMITED

Software Engineer Intern

June 2017 - June 2017 (1 month)

Navi Mumbai, Maharashtra, India

- Implemented frontend for android app automating traffic ticketing system at Reliance campus, reducing data entry time by 50%.
- Developed project assignment and feedback android app, featuring different authorization levels.

Education

University of California, Riverside

Master's degree, Computer Science · (September 2019 - March 2021)

NIIT University

Bachelor of Technology (B.Tech.), Computer Science and Engineering · (July 2015 - October 2019)
